

FREE STANDING MOVING ROLLED TEXTILE STORAGE KIT SYSTEM

SPECIFICATIONS

MATERIALS & CONSTRUCTION

1. All structural members have bolted connections for ease of installation/ease of relocation by the user.
2. The system requires no track.
3. Active guidance is accomplished by a tube at the top of the system that telescopes over the aisle position.
4. These patented tubes with ball bearing rollers travel with each unit and provide smooth, quiet operation.
5. Passive guidance is achieved using the lower ball bearing guide rollers which keep each unit straight through its entire range of movement.
6. A magnetic catch ensures the unit will remain in the stored position where unlevelled floors exist.
7. The aisles are kept clear and unobstructed, floor and overhead.
8. The entire system is especially engineered for easy installation and relocation by user.
9. The four vertical posts and corresponding structural cross members are fully engineered aluminum tubes.
10. The Moving Storage Units and the structural components are all aluminum with no paint.
11. Spacing between units is fully and easily adjustable by user.
12. Each storage unit is welded at all four corners to guarantee torsional and dimensional stability.

ADJUSTABLE ALUMINUM POLES

1. Poles and corresponding supports are all aluminum with no paints or applied finishes.
2. Poles and supports/brackets are fully adjustable.
3. Pole supports can be added or removed at any time.
4. Adjustability is accomplished with a standard allen key.

PERFORMANCE & LOADS

1. The standard poles are 1.0" (25.4mm) x 2.0" (50.8mm) a radiused rectangular extrusion.
2. The standard poles shall weigh approximately .81 lb/ft (1.20kg/m).
3. The panel pulls out to expose its full width.
4. Less than 15 lb or 6.8 kg of force is required to place a fully loaded panel in motion.
5. Cushioned stops limit the panel at both ends of its travel.
6. Individual components weigh less than 30 lb/14 kg. (Original system size)

If you have specific space requirements or limitations, you'll be pleased to know that PerfectFit™ Storage Kit systems are individually crafted and can be customized. Speak to our service representatives about how we can accommodate your needs.
