

## FARID BOGANI TECHNOLOGY CENTER

Cameron LNG, Cameron, LA

**EXHIBIT SIZE:**  
2,600 Square Feet

**SERVICES PERFORMED:**  
Schematic Design, Design Development, Exhibit Text, Graphic Design & Production, Casework, AV Production, Installation

With technology at the heart of its story, the new Farid Bogani Technology Center is sleek, forward-thinking, and full of larger-than-life exhibits to explore. Aided by virtual reality (VR) technology, visitors can safely tour the adjacent high-security plant, shrink to the size of a molecule, and even visit the frigid dark side of the moon. As visitors continue their journey through the center, custom capacitive touch systems provide a deep-dive into the chemistry of the liquified natural gas process, while gamified interactives encourage individuals of all ages to “play engineer” as they learn how a state-of-the-art natural gas plant functions. Between the technology-fueled adventures, wetland habitat exposé, and inspiring stories about STEM careers, the exhibits at Cameron embody innovation-fueled-imagination.
