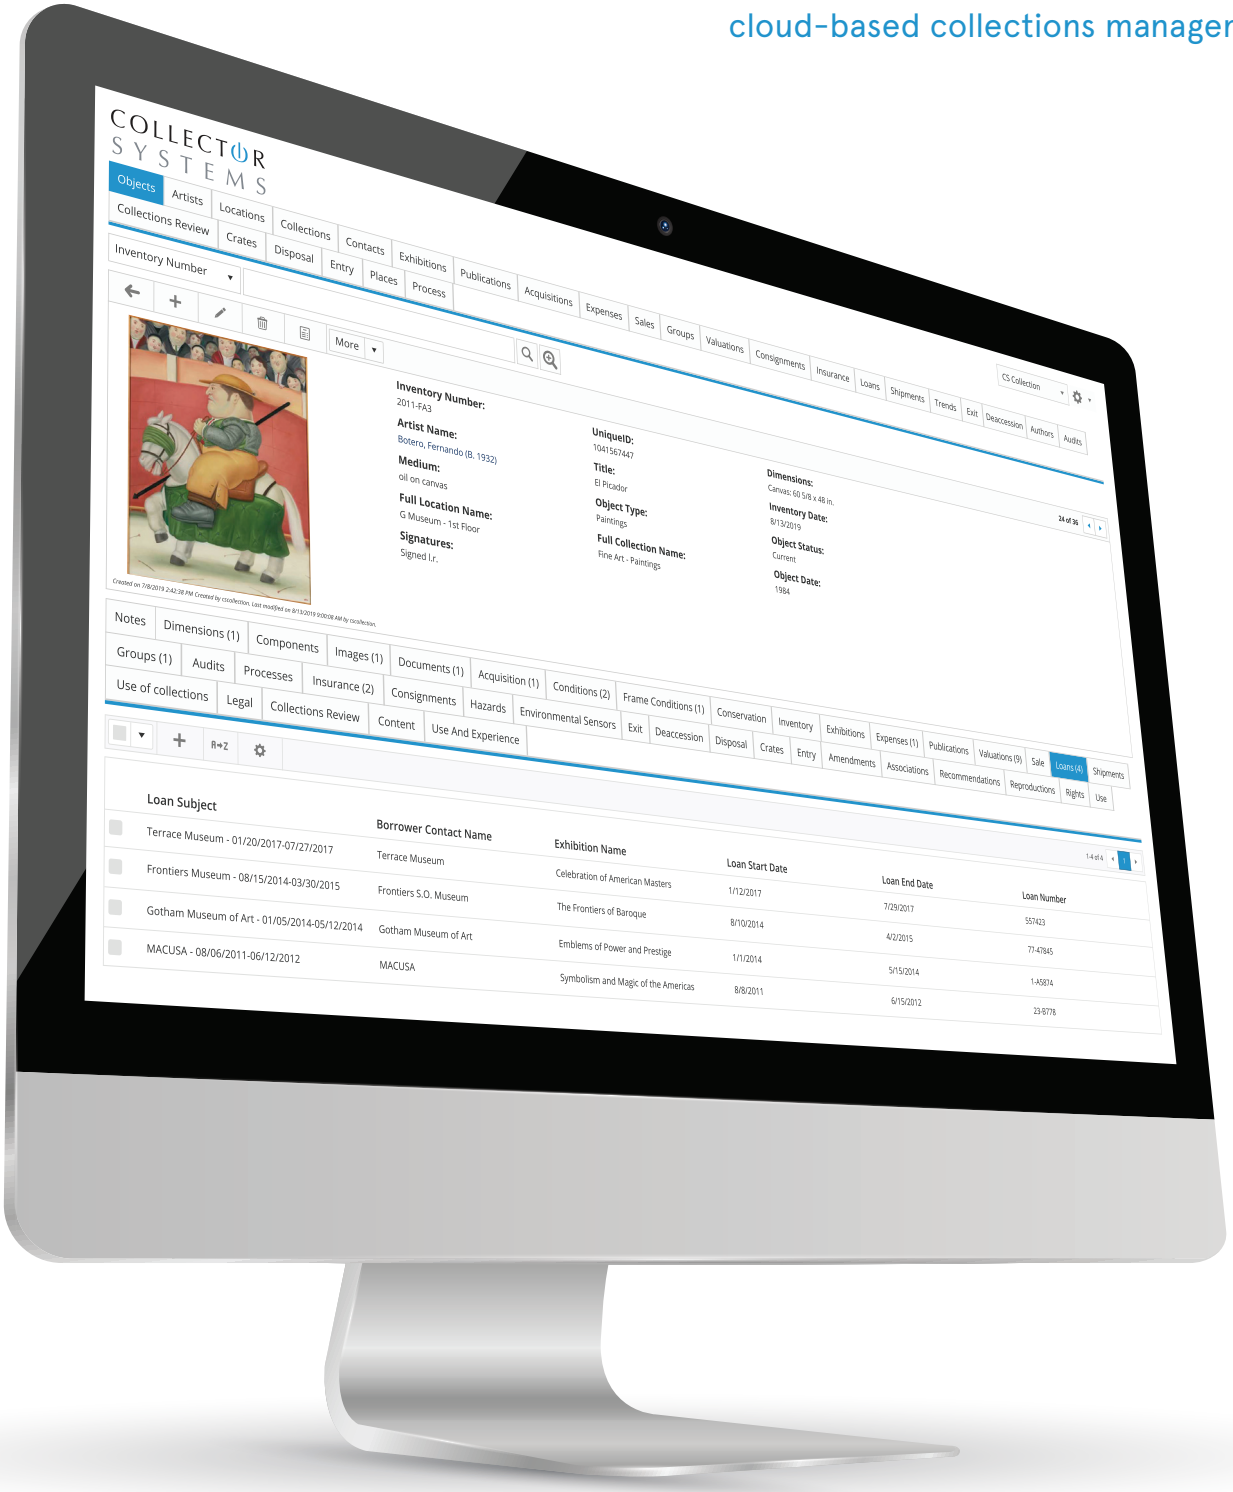
COLLECTOR SYSTEMS

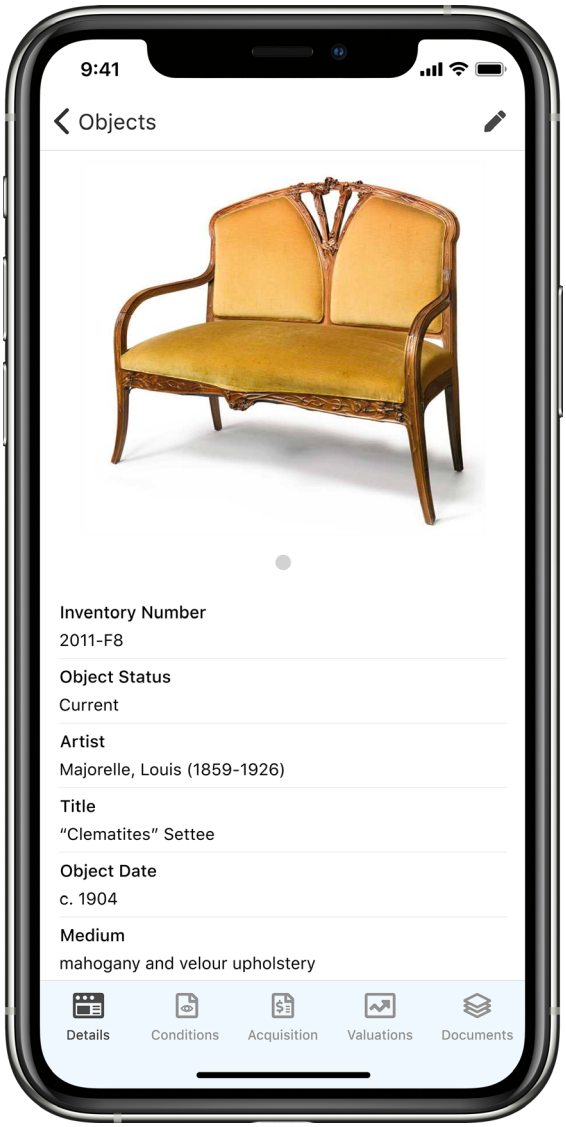
cloud-based collections management



Power. Security Simplicity.

Take charge of your collection with a CMS that works for you.

The finest collections management solution for museums, historic homes, foundations, and archives. With Collector Systems' cloud-based collections management software, you can manage and share your collection like never before. Access and update your account from any web-enabled computer, smart phone, or tablet.



Procedures

Take charge of collections management with built-in workflow for every process: Entry, Acquisitions, Exit, Deaccession, Disposal, Condition, Conservation, Exhibitions, Loans, Shipments, Publications, Valuations, Insurance, and more.

Reports

We make it easy for you to add material to your Collector Systems account, and create bespoke reports for any purpose. Select from a variety of pre-set templates, and add custom details to create any report you need. Prepare inventory checklists, complex loan agreements, comprehensive financial reports, and more.

Data Migration

Moving to Collector Systems couldn't be easier - from any legacy system or database.

Spectrum Compliant

COLLECTOR SYSTEMS

Actually ***enjoy*** using your CMS.

A powerful collections management software for all types of collectors. Collector Systems makes it easy to catalog all your fine art, jewelry, antiques, books, and more. A subscription to Collector Systems gives instant access to powerful features that will make managing any collection a snap.

Condition reporting

Capture condition information from anywhere using our iOS and Android apps. Add detailed notes, upload and annotate images to highlight specific condition issues, and generate custom condition reports. Maintain the full condition and conservation history for every object in the collection.

Track

Track upcoming shipments, attach waybills, and record the location and contact for every shipment.

Loans

Easily view all objects for an exhibition or loan, attach documentation, and record all related details.

COLLECTOR SYSTEMS

The technology you need, the people you trust.

Collector Systems employs the most advanced cloud-based technology, combining multiple layers of protection with seamless upgrades and maximum uptime. The privacy and security of your data is our first priority.

Two-factor Authentication

Our mandatory implementation of two-factor authentication strengthens the security of the login process. This enables us to offer a higher level of protection for our clients' data hosted in our secure server environment.

Security Framework

Collector Systems adheres to the best practices described in the ISO 27002 security standard, which is recognized globally as the definitive framework for establishing and maintaining information security.

Security on the Cloud

On Collector Systems, your data is encrypted end-to-end, even at rest. With our cloud-based information management, your data is backed up daily in multiple geographic locations - with restoration available in 15 minute intervals.
